Features (Business Edition)

The all-new MiiPC Business Edition integrates the capabilities of the Android OS and MiiPC into a business environment - companies and businesses can work securely using business-oriented apps made to fit on your monitor and the big screen all at an affordable price.

MiiPC Kiosk Mode (via MiiPC Kiosk Launcher)

With the all-new Kiosk Mode, retailers and businesses alike can enjoy the security and affordability of the MiiPC on the big screen. Powered by the Android OS, Kiosk Mode provides you with the security you need to lock down and restrict users from using unapproved applications. Kiosk Mode also provides the option of having a single application always present in front of the user, further restricting access to other content. Kiosk Mode is password-protected and blocks users from changing system settings, ensuring maximum security. By locking and restricting access to the user, Kiosk Mode helps increase focus and productivity in the workplace while at the same time increases product promotion and services in retailers around the world.

MiiPC Featured Apps Store for Business

Working just got a lot more easier - The Featured Apps Store for business brings with it a plethora of apps tailored for businesses and organizations alike. Our App Store provides different categories that fit into each area of the workplace such as Productivity, Communication, Media, Thin Client Solutions, and many other useful utilities. Whether it be an Office-compatible productivity suite, VOIP service, or even a Remote Desktop Client, users can find ways to make their use of the MiiPC instantly productive.

MiiPC Multi-User Mode (via MiiPC Launcher)

Remotely provision multi-user login access to MiiPC with MiiPC Launcher and its companion admin control mobile app for iOS and Android. Create users, assign app access, set time limit, monitor real-time usage and usage reporting information from anywhere. Individual user can access assigned Android apps and Web apps once login to the password protected MiiPC desktop account.

MiiPC Reseller Portal & Coupon Code Install

Introducing MiiPC Coupon Code Install, an all-new feature where qualified resellers can create their own MiiPC reseller portal account to manage their own coupon codes for their target audience. Each coupon code can contain up to 15 different Android apps of their choosing and distribute them amongst users, providing them with a more enhanced and personalized experience. Resellers can create up to 5 active coupon codes, giving them the option to satisfy the needs of different customers. Instead of having to browse through the app store and gruelingly select apps one-by-one, users can jump right in with their coupon codes, download and install these apps, and use them right from the get-go.

Extended Content Library Access

Supporting NTFS and FAT32 file systems, the MiiPC can easily connect to your USB external hard drives and access multimedia content whether it be files, images, audio, or videos. Go ahead and plug in your USB external hard drive into the MiiPC and access loads of content. Schools or other organizations can utilize the MiiPC to access large archives of educational video content, both online and offline.
