Features
(Home Edition)

Android All-In-One Family Device.

One device capable of doing multiple things - desktop computer, gaming console and media center all in a single device

Lifetime Cloud-based Parental Controls.

MiiPC comes with a lifetime membership to our cloud-based parental controls. Access to the companion MiiPC Parental Control mobile app for iOS and Android, or Parental portal from any major browser, parents can remotely monitor, manage, control and view history report of their children's online & local activities on a MiiPC device from anywhere.

Desktop Computing Power.

With a powerful Dual ARM processor, the latest Android Jelly Bean software, MiiPC is ready for what you and your family want to do with access to over 800,000+ Android applications and 500+ hand-picked web apps.
With precise PC-like browsing experience including Flash* support, MiiPC delivers many of the desktop features to which people have grown accustomed.

*Flash Player will need to be installed separately

Cannonball Gaming Console.

With over 400 kid-friendly curated Android game titles and off-the-shelf game controller support the MiiPC really takes off, delivering all of the genres you and your kids like: from shooters and action adventures to role playing games and puzzles with an amazing big screen experience while still under the safe-guard of the MiiPC parental control features.

Media Center.

With HDMI connectivity and native 1080P support, MiiPC provides a gateway to movies, videos, music and photos to your big screen. Whether it's 3rd party media center or built-in MiiPC Media Server, content sharing and viewing on a big screen is super easy.
Full NTFS and FAT32 file systems support for external HDD storage connectivity.

Gaming Center.

With the additional game controller support the MiiPC really takes off, delivering all of the genres you and your kids like: from shooters and action adventures to role playing games and puzzles with an amazing big screen experience.

Works both Online and Offline.

Like a desktop PC, MiiPC lets you work offline when you need to focus, play your own media, or when you don't want to rely on the web.
